

Attendance: Jack Xiong, Aisheng Wu, Xiaobo Xie, Chunhui Pan, Gerhard Meister, Gary Toller, Stuart Biggar, Gene Eplee, Eric Vermote, Vincent Salomonson, Chris Moeller

Scheduled Agenda

Item 1: Recent L1B LUT delivery

- Terra forward update – V4.3.0.54 (Oct. 10)
- Aqua forward update – V4.3.1.34 (Oct. 24)

Item 2: Instrument status

- Terra and Aqua MODIS are in nominal operations.
- As of Oct 8, MODAPS has experienced several transmission problems which disrupted the receipt of L0 data for processing (Terra and Aqua). Data gaps exist during the time frame of 2006/282-295 (Oct. 9 to Oct 22). These gaps will be filled in as the data becomes available. No data loss is expected.

Item 3: MCST recent activities

- Science Team Meeting preparations – see attached tentative agenda.
- Continuing analysis of RVS issue.
- discuss A0, A2 issue with Chris Moeller during MODIS science meeting.

Item 4: Around the Table

- **VS:** Expressed his concern AGAIN about the recent Aqua data losses and data transmission problem.
- **Chris:** Expressed his concern about collect 4 Aqua data availability on LADDS web.
- **Action item:** discuss de-stripping algorithm and the possibility of implementation in L1B level with all teams during MODIS science meeting
