

Conclusions

- ★ Boutic provides interdetector calibration (good) but makes resampling w/ interpolation difficult (bad)
- ★ Level 1G & 2G products could be very helpful in some cases, but further work/thought is needed
- ★ Resampling w/ interpolation is difficult. ✕
Need a MODIS-specific tool. More thought required
- ★ Need to define a "day" e.g., oceans

Action Items

- ★ 1-2G idea needs more exploration - Harnden?
(Gordon? Menzel? Stricker? Wolfe? Ungar?)
