

MODIS and Suomi NPP Discipline Summary Report

By

Bryan A. Franz and Carlos E. Del Castillo

June 10, 2016

Some Salient Points:

Validation OC

Small number of matchups for VIIRS
In pixel variability

Validation SST

What are the issues???
In water instrumentation?
In pixel variability?

Do we need to develop new instrumentation?

Data Assimilation

Increase temporal and spatial product coverage

Autonomous profilers

Resolve vertical structure.

Some thoughts on this meeting

Data providers

State of the data records

Data quality issues

Requests for the community for cal/val data

Etc...

Data users

Feedback on data formats

Feedback on data quality
What needs improvement?

Where do we need more cal/val

**2-3 days every 18 months?
+ random web meeting.**
